Questys Solutions is a technology-driven company providing advanced electronic records & content management solutions to a variety of markets in the US and abroad.

Import Data Types Into Granicus

Meeting Name and Schedule

Agenda Items

Supporting Documents

Meeting Attendee List

Voting Action List

Agenda Publishing Settings

// The Questys-Granicus Connector helps us with our meeting workflow because all of the agenda data is sent to Granicus. It helps during the meeting because the recommendations and subjects are there, and after the meeting it makes it so easy for us to prepare our minutes. //

- Brenda Alcazar / Deputy City Clerk,
City of Santa Barbara

Granicus is committed to building open architectures, standards, and lasting partnerships with industry leaders. We want to offer clients the most complete, flexible solutions on the market that integrate with other proven solutions.

Questys' LegisStream™ Electronic Agenda Management system automates the entire agenda process, from creation of staff reports, tracking items through the approval process, making last minute item changes/addition, and with a simple click the system will create and convert your complete agenda packet into PDF format. It also archives the agenda packets and backup material and allows full-text keyword searching. Granicus provides live and archived streaming for government and allows users to manage and distribute unlimited meetings and events. With the Questys-Granicus Certified Connector, organizations get the best value from industry-leading systems and can rely on the support and expertise of both companies.

For organizations with multiple legislative solutions, it is important for data to be efficiently transferred between systems to avoid manually duplicating work in multiple systems. To solve this problem, Granicus and Questys developed a certified connector that saves our users countless hours of work.

Improve Workflow with a Trusted Integrated Solution

The Questys-Granicus Certified Connector combines Questys' LegiStream™ Electronic Agenda and Granicus' streaming media solution. Through a simple interface, the connector allows users to import agenda data into the Granicus system and also exports the videos and minutes from Granicus onto Questys for storage and archival. This technology was designed to improve the day-to-day operations of staff members responsible for agenda and minutes preparation.
