

VillageFax® E-Mail to Fax

VillageFax Corporate Desktop

VillageFax provides a variety of capabilities and management tools including Email to Fax, specifically designed to increase user productivity.

Key Benefits:

- Ease of use through a familiar user interface.
- Increased productivity by faxing directly from PC desktop.
- Create fax-able forms of any document that may be attached to the Email.
- Personalized documents for each recipient through fax document merge.
- Management billing details are provided by company, user, and project ID.

VillageFax Broadcast

VillageFax provides an extensive set of features to quickly and easily broadcast documents to any size list of recipients.

Key Benefits:

- Fax directly from your email or CRM directory.
- Utilize custom cover pages or Fax Merge documents for your application.
- Personalize documents for each recipient using Fax Merge.
- Manage delivery priorities.
- Schedule delivery by time zones.
- Automatic retries that save you time to do other important tasks.

VillageFax Production

VillageFax.net has the capability to handle the requirements of any production fax application through Email to Fax. The capacity requirements and responsiveness necessary to handle such applications, as faxing invoices directly from your ERP or E-Commerce order fulfillment, are strengths of the service.

Key Benefits:

- Email to Fax toolkits for quick and easy implementation reduce your time-to-market
- Highly reliable, fault tolerant systems consistently deliver pages
- Detailed reporting available in any period that you define
- Custom forms delivered through your application

Intelligent Dynamic Information Delivery...

Enterprise Class Performance

Overview

VillageFax provides electronic delivery services to enterprises in need of more cost-effective and efficient ways of receiving and processing business information. Our extensive set of features enables users to quickly and easily broadcast documents to individuals or any size list of fax recipients. VillageFax users send faxes directly through any preferred email system, without the need of fax hardware, software, or phone lines. Simply address your email to the destination fax machine number, followed by the VillageFax internet address: (faxnumber@villagefax.net). In a matter of moments your fax is routed directly to the recipient's fax machine. In addition to individual and broadcast capabilities, enterprises can fax enable critical applications which include a variety of corporate applications such as ERP, CRM, and web based E-Commerce.
