

VillageFax® High Volume Fax Distribution

VillageFax provides an extensive set of features to quickly and easily broadcast documents to any size list of recipients. Our high-volume distribution services enable customers to immediately extend their reach with clients, prospects and targets with exceptional functionality, performance and business value.

VillageFax users have the ability to personalize individual documents, create campaigns and manage simultaneous broadcasts directly from the desktop client or web browser. One simple click reaches an audience of any size. VillageFax High Volume Fax Distribution is perfect for Public Relations staff needing mass distribution of press releases, News agencies with breaking news to nationwide editors or marketing and customer service departments needing to distribute materials, sales and product bulletins to customers, vendors and prospects.

VillageFax User Benefits:

- Intelligent interface gives users immediately ability to operate the service
- Convenient management tools to organize and launch personal lists
- Tools to design and control the look and effect of their cover page or merge documents
- Complete schedule control

VillageFax's High Volume Fax is equipped with a comprehensive set of tools that empower our clients to accomplish these tasks assigning users their own personal directories. After the broadcasts are sent, users can easily retrieve historical information of any broadcast to be viewed by the browser, emailed or printed. This data allows users to effectively account for successes and failures of each broadcast.
