

Minimum System Requirements for Questys® CMx

Server Requirements:

- Pentium compatible, 2GHz or faster CPU, dual core recommended
- Minimum 2GB; 4GB recommended
- 512MB hard disk space, plus proportional space for data repository.
- Windows 2003 Server or later, Windows XP SP2, Windows Vista Business or Ultimate.
- .NET Framework 2.0
- .NET Framework 3.5 sp1
- SQL Server 2005 or later
- Setup program automatically installs required software, except for the operating system, if not already present on the target machine.
- Microsoft Office must be installed in order to pull text from Office documents.
- Adobe Acrobat Reader must be installed in order to pull text from Adobe documents.

Setup prerequisites:

Before starting Questys CMx Server setup, ensure that the following prerequisites on the target machine are installed or configured:

- Message Queuing & Internet Information Services (IIS) must be installed and enabled prior to starting setup.
- SQL Server instance named QUESTYSX, with full-text service installed and enabled. If the default instance is not found, setup will automatically install new SQL Server 2005 Express with Advanced Services SP2 instance named QUESTYSX.
- Ensure that the Distributed Transaction Coordinator service is configured for automatic startup and is started.
- When ClickOnce feature is selected for installation, IIS service is required. It is used for hosting the Questys CMx Client click-once deployment.
- The user account running setup must have administrative privilege on the server.

Questys CMx Client Setup (ClickOnce) Requirements

Questys CMx Client runtime requires:

- Pentium compatible 1GHz or faster CPU
- 512MB RAM, 2GB recommended
- XGA (1024x768) graphics or better
- Windows XP SP2, Windows Vista, or later
- .NET Framework 2.0
- .NET Framework 3.0
- Setup program automatically installs all the required software, beyond the operating system. If software requirements are already on the target machine, the user account running setup does not need administrative privileges on the client, as Click Once applications are installed per user.
